

AS3690t

...go from mixed documents to usable data without all the hassle!

AS3690t

One operator, one touch, one machine.
The document imaging solution all in one.

IMAGE CAPTURE DESK

The OPEX® AS3690t™ is more than just another scanner; it is an image capture workstation. The AS3690t was designed with ergonomics and workflow in mind—providing ample work space and everything within arm's reach. Equipped with a unique drop feeder, the AS3690t makes it easy and comfortable for the operator to prepare, review, and scan documents.

DROP AND SCAN

At the heart of the AS3690t is drop and scan technology. Simply drop the documents onto the conveyor, and it will align, flatten and feed them into the imaging module. The AS3690t will then capture, process, sort, and output contents and data automatically.

With only one operator, the AS3690t can handle a variety of media including checks, forms, claims, accountable mail, correspondence, envelopes and most other items. Unlike any other high-speed scanner, the AS3690t is able to scan a wide range of irregular, folded, and damaged media—without the need for careful stacking or jogging.

The AS3690t can be customized to identify most types of documents. For unrecognized document types, the AS3690t offers three quick and convenient methods for operator identification. The operator can pass the item in front of sensors on the conveyor to activate IdAssist™, tap a key on the KeyAssist™ module, or simply touch the display screen.

Like most traditional scanners, the AS3690t can be fed using automatic Stack Mode. With this feature activated, stacks of media can be placed on the conveyor to be separated and fed automatically at full speed.

What's unique about the AS3690t is its ability to handle mixed-sized media in this mode.

DATA INTEGRITY

The workflow of the AS3690t provides excellent transaction and data integrity. The work can usually be scanned exactly as it is received and can be easily monitored in real time by a single operator. As documents are processed on AS3690t, operators have an opportunity to ensure every item is properly captured and identified. The display shows each image as it is scanned and also groups and color-codes documents for easy transaction verification. For further tracking, a customized audit trail can be printed on the front and/or back of documents.

The AS3690t's simplified process eliminates the additional costs associated with traditional image capture. It is simply the most efficient and reliable way to capture data from your documents. The OPEX AS3690t quickly captures all kinds of media, providing efficient workflows and superior cost savings.

key specifications:

Scanning Speed:

- BITONAL: up to 90 ppm at 200 dpi
- GRAYSCALE: up to 90 ppm at 200 dpi
- COLOR: up to 80 ppm at 200 dpi

Output Formats:

- DATA: IEM, ASCII, XML
- IMAGE: TIFF, JPEG

Document Size: 2.0" x 3.5" to 8.5" x 14.0"

Media Checking: double feed, length,height, thickness, envelope detect
